Re: Neklason Lake Radio Relay Site

Dear Mr. Wickes:

The U.S. Environmental Protection Agency (EPA), through its contractor, Ecology and Environment, conducted sampling of your multi-purpose water well on January 4, 2000. Enclosed are analytical results for the sample collected. The table includes EPA drinking water standards and results for each compound/analyte that was detected. The following were not detected in the sample: semivolatile organic compounds, chlorinated pesticides, polychlorinated biphenyls, gasoline range organics, and diesel range organics

If you have questions, I can be reached at 206 553-0115 or leblang.deborah@epa.gov.

Sincerely,

Deborah Leblang
Site Assessment Manager
